Website QA Report – www.lankatalents.lk

1. Overall Testing Approach

The testing was conducted using a manual exploratory testing approach, focusing on key functionalities of the website. The following aspects were evaluated:

- **Functionality Testing** (Forms, navigation, links, search)
- **UI/UX Testing** (Layout consistency, responsiveness, readability)
- **Compatibility Testing** (Browser & device compatibility)
- **Performance Testing** (Page load speed, responsiveness)

Testing was performed on Google Chrome (Windows 11) and Mobile (Android/Chrome/Edge).

2. Bug Reports

Bug #1: Registration Form Validation Failure

Bug ID: LT-001

Title: Registration form accepts invalid email format and Registration get too much time

Severity/Priority: High

Justification: - **Functional Impact:** Users can register with invalid emails, leading to failed communications (password resets, notifications).

- **Data Integrity:** Pollutes the database with incorrect entries.

- **User Experience:** Frustration when users don't receive emails due to typos.

Affected URL/Feature: /register (User Registration)

Steps to Reproduce:

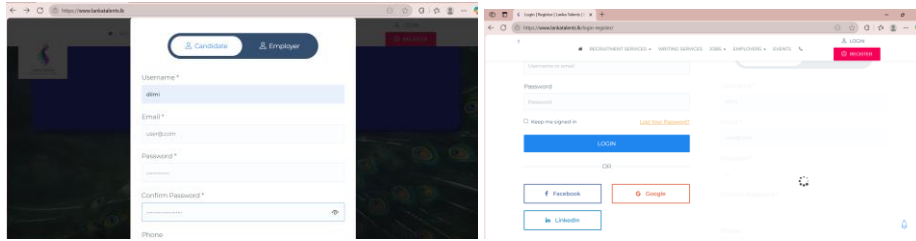

1. Go to www.lankatalents.lk/register
2. Enter a name and phone number.
3. Enter an invalid email (e.g., user@.com).
4. Submit the form.

Expected Result: Form should reject submission and display an error message.

Actual Result: Form accepts invalid email and proceeds.

Environment Details: Chrome (Windows 11), Firefox (Mobile)

Attachments: Screenshot of form submission with invalid email.

Bug #2: Mobile Responsiveness Issue on Job Listings Page

Bug ID: LT-002

Title: Job listings table overflows on mobile screens

Severity/Priority: Medium

Justification: -

User Experience: Forces users to scroll horizontally, leading to frustration.

- **Mobile Traffic Impact:** If a significant portion of users are on mobile, this directly harms engagement.

Affected URL/Feature: <https://www.lankatalents.lk/2022/04/>

Steps to Reproduce:

1. Open www.lankatalents.lk/jobs on a mobile device.

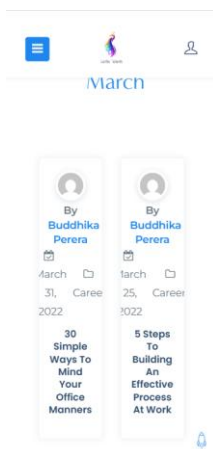

2. Select year from sidebar.

Expected Result: Table should be responsive and fit the screen.

Actual Result: Table content overflows, requiring horizontal scrolling.

Environment Details: Galaxy(android), iPhone SE

Attachments: Screenshot of misaligned table on mobile.

Bug #3: Desktop View Issue on Job Apply button

Title: Mobile view - Misaligned buttons in job application form

Severity/Priority: Medium

User Experience: Forces users to scroll horizontally, leading to frustration

Affected URL/Feature: <https://www.lankatalents.lk/browse-jobs/?filter-title=&filter-category=>

Steps to Reproduce:

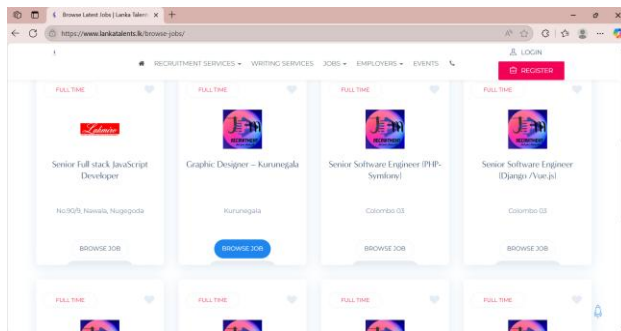

1. Open the site on a mobile device.
2. Go to any job application page.
3. Scroll to the submit button.

Expected Result: Buttons should be properly aligned.

Actual Result: Buttons overflow or misalign.

Environment Details: Chrome , Edge

Attachments: Screenshot of misaligned buttons

3. Test Cases

Test Case

ID	Description	Steps	Expected Result	Status
TC-01	Verify user registration with valid data	1. Fill all fields correctly 2. Submit	Account created successfully	Fail

Test Case ID	Description	Steps	Expected Result	Status
TC-02	Verify error message on invalid email	1. Enter invalid email 2. Submit	Shows "Invalid email" error	Fail (Bug LT-001)
TC-03	Check footer link functionality	1. Click "Terms of Service"	Opens correct page	Pass
TC-04	Mobile view of job listings	1. Open /jobs on mobile	Responsive layout	Fail (Bug LT-003)

4. Priority Summary Table

Bug ID	Severity/Priority	Justification Summary
LT-001	High	Invalid data entry, impacts communication & user trust
LT-002	Medium	Hurts mobile UX but still usable
LT-003	Medium	Core feature failure, directly affects business goals

5. Conclusion

The website has several functional and UI issues that affect user experience. Critical bugs need immediate attention, while medium-priority bugs (LT-001) should be fixed in subsequent updates.

Recommendations:

- Implement proper form validation.
- Optimize mobile responsiveness.
- Debug search functionality.

Next Steps:

- Retest after fixes are deployed.
- Expand test coverage to payment & user dashboard features (if applicable).
